SEASON  
1952

**TAYLOR**  
**Gardens**

*Growers of Choice* **GLADIOLUS**

**AUNT LEA**

Last year we introduced "Aunt Lea" and we have good reasons to believe that it has been well received. We have a very large stock of this splendid variety, therefore, we are drastically reducing last year's prices.

**AUNT LEA (SPORT OF HIGH FINANCE)**

**HEIGHT OF SPIKE IN THE FIELD** 64 inches

**NUMBER OF BLOOMS OPEN** 6, and up to 6 showing color

**NUMBER OF BUDS** 20

**WIDTH OF BLOOM** 5"

**HEIGHT OF SPIKE WHEN CUT** 48"

**HEALTH**—(foilage, bulb, and propagation) **EXCELLENT, BLOOMS MID-SEASON**

**COLOR**—A very clear light orange with a cream white throat. We have never seen this flower flake or show any other marking except that under a light it throws off a slight golden tint. We believe this to be a really worthwhile addition to the orange class. This is in the 520 class.

Per	Large	Medium	Small	Per Bulblets
1	\$ .25	2 for \$ .25	3 for \$ .25	25 for \$ .75
10	1.75	2 for 1.25	3 for .75	100 for 1.75

**GROWERS UNITS**

5 Large	10 Medium	10 Small	500 Bulblets	\$ 5.00
10 Large	25 Medium	25 Small	1000 Bulblets	10.00

These are all prepaid, for larger amount write for prices.

## GREETINGS, FRIENDS:

Thanks again for the past favors. They were deeply appreciated and we hope that we shall continue to receive your favors.

We are going to offer a few Do's and Don'ts for your Glad Garden.

First: open package as soon as received. Examine your bulbs, and, if you are not ready to plant, store them in your vegetable cellar, or a place where it is not too warm or too cold. After your soil has been prepared in the Spring of the year, furrow out your rows and scatter in the bottom of the trench, a good Commercial fertilizer such as 4-12-4, 4-8-10, or 5-10-10 or any other good Commercial fertilizer, that is available in your community. Mix well with the soil, setting large bulbs about five inches deep, and five inches apart, other size bulbs in proportion, with the smallest about two inches deep, and two inches apart. All Glad bulbs must be dipped before planting, in order to kill any thrips or disease that may be on them. We use Lysol. One and one-half tablespoonful per gallon of water. Soak bulbs three hours just before planting. Any water container will do. Do not plant near building, heavy rooted plants such as trees, etc. Cultivate frequently enough to keep soil loose, and free from weeds, not too deep, and after every heavy rain or watering. Spraying and dusting for thrip (adults are small black insects about 1/16 of an inch long) we have used the two following formulas:

DDT Spray—2 rounded teaspoonsfuls DDT (50%) wettable; 1 teaspoonful Dreft; 2 gallons water, mix and spray every week or ten days when foliage is about 8 or 10 inches high.

DDT Dust for thrip: 5% DDT dust and we use a roto dust gun. This is the quickest and easiest control. Not as effective as spraying but very much faster.

Dust once in about every 10 days after foliage is 8 or 10 inches high. Do not use DDT dust on blooms as it will spot.

A good idea is to sprinkle bulbs with 5% DDT dust while bulbs are in storage.

When cutting blooms be sure and leave at least four leaves so as to mature the bulb. Bulbs should be dug as soon as the foliage starts to become yellow or after a heavy frost. Dig bulbs when soil is dry if possible. Using a digging fork, lift bulbs by the foliage. Cut tops off close to the bulbs shaking out loosedirt. Use shallow wooden trays or clean paper bags, marking each variety. Curing and cleaning bulbs; remove bulbs to warm dry place where there is a good circulation of air. After a period of three or four weeks, or when bulbs are properly dried, old bulb is easily broken away from the base of the new bulb. Be sure and leave husk on bulb, as this is a protection in storing. Ideal storage temperature is between 34 and 45 degrees F, or in a good vegetable cellar.

Terms of sale: Cash with order, or twenty-five percent, the rest C.O.D. No order for less than two dollars and no item for less than ten cents please. We have made our prices low enough so as to eliminate all confusing discounts. We are very liberal with our overcounts. All retail orders will be sent prepaid. If out of size wanted, we will ship next size, giving equal or better value.

These are State inspected bulbs. We try to observe the fact that making friends is very essential to our business.

Sincerely yours,

TAYLOR GARDENS
